RESEARCH SUMMARY

I am interested in Atmospheric Physics. My research focuses primarily on precipitating convection, which I study using the combination of Large Eddy Simulations/Cloud Resolving Models and a Lagrangian Particle Dispersion Model to obtain a process level understanding of the fundamental dynamics, and also using observational data from satellites and stable water isotopes in precipitation. I apply these tools to research topics such as downdraft and cold pool dynamics, and also to the study of severe and extreme weather events and how these will respond to climate change.

EDUCATION

- 2012 Ph.D.**, Theoretical Physics, Imperial College London
Thesis: “Counting gauge invariant operators in supersymmetric theories using Hilbert series”
Advisor: Prof. Amihay Hanany
- 2007 M.Sc.**, Theoretical Physics, Università degli Studi di Milano – Bicocca
Thesis: “Partition functions for the chiral ring of supersymmetric gauge theories”
Advisor: Prof. Alberto Zaffaroni
Final grade: 110/110 magna cum laude
- 2005 B.Sc.**, Physics, Università degli Studi di Milano – Bicocca
Final dissertation: “Representations of SU(3) and the quark model”
Advisor: Prof. Alberto Zaffaroni
Final grade: 110/110 magna cum laude

POSITIONS

- 2018-current** Assistant Professor, Dept. Atmospheric Sciences, U. of Hawai‘i at Mānoa
- 2015-2018** Research Associate, Earth & Planetary Sciences, Harvard University
- 2014-2015** Research Assistant, Earth & Planetary Sciences, Harvard University
- 2012-2014** Environmental Fellow, Center for the Environment, Harvard University

Atmospheric Science

GRANTS AND CONTRACTS

Collaborative Research: Dynamics of Unsaturated Downdrafts, Cold Pools, and Their Roles in Convective Initiation and Organization, NSF/Harvard, subc, \$461,274, 05/01/17–04/31/20.

Assessment of Cloud Development and Organization Processes within the Madden Julian Oscillation using ARM Observations and Lagrangian Modeling, DOE, co-I, \$576,876, 10/01/19–09/30/22

TEACHING EXPERIENCE

Course	Instr.	Sem	Schedule	Sum Eval
ATMO 620 Physical Meteorology	w/ Yuqing Wang	F, 2018	T Th 10:30-11:45	n/a
ATMO 416 Tropical Analysis and Forecasting	w/ Steven Businger	S, 2019	T Th 13:30-17:30	n/a
ATMO 620 Physical Meteorology	G.T.	F, 2019	T Th 10:30-11:45	n/a

INVITED PRESENTATIONS

- 2019** Università degli Studi di Milano – Bicocca, Milan, Italy
- 2018** Woods Hole Oceanographic Institute, Woods Hole, USA
- 2018** Colorado State University, Fort Collins, USA
- 2017** Ludwig-Maximilian Universität, Munich, Germany
- 2016** University of Washington, Seattle, USA
- 2016** Max-Planck-Institut für Meteorologie, Hamburg, Germany
- 2014** Massachusetts Institute of Technology, Cambridge, USA

AWARDS & SCHOLARSHIPS

- 2015** The Foundation Blanceflor Boncompagni Ludovisi, née Bildt Scholarship
- 2012-14** Harvard University Center for the Environment – Ziff Environmental Fellowship

SERVICE

Committee Experience

- 2018** Organizer of session “Progresses in Understanding Atmospheric Convection” at AGU Fall Meeting

- 2017** Organized and chaired session “Land-Atmosphere Interactions, Biosphere-Boundary Layer Feedbacks, and Moist Convection” at AGU Fall Meeting
- 2015** Chaired session “Other Mesoscale Processes” at 16th Conference on Mesoscale Processes, Boston
- 2012-current** Reviewer for Geophysical Research Letter, Journal of the Atmospheric Sciences, Journal of Geophysical Research, Nature, and various proposals for National Science Foundation.

Educational Outreach

- 2017-current** Co-host of Point Nemo, a science podcast that discusses the most important questions and the research frontiers within each discipline.
